

# What's in Water?

## Chemistry Unit 2

---

In a 3-hour laboratory program at the University of Melbourne, students will determine the concentration of ions or complexes in a water sample using UV-visible spectroscopy. The workshops assist students with VCE Chemistry Unit 2 and can be the basis of a scientific investigation on water quality.

Students will collect and analyse a water sample, measuring concentrations of either copper, iron, phosphate or nitrate ions.

### **DETAILS**

\$38 per student (including GST).

3 – 14 June 2024, 9:00 – 12:00 or 1:00 – 4:00

University of Melbourne, Parkville Campus

We will provide lab coats and safety glasses for each of your students and staff. Those attending a session are required to wear closed toe shoes that cover the top of the feet.

We may be required to change this program if COVID-19 restrictions apply at the time.
