Energy without CO₂

A search for cleaner and more efficient ways to transform energy is one of the biggest research challenges for Australian science. This hour-long session will demonstrate the way that the energy for transport, heating, lighting and cooking could harnessed without generating CO₂, and some of the consequences of greenhouse gases accumulating in the atmosphere. The show is designed around Levels 5 and 6 of the Victorian Essential Learning Standards.

DETAILS:
Years 7-10, 60 minute duration

Cost Structure:
A 2-tier cost structure operates for the travelling programs. There is a cost per session and a minimum cost per day - whichever is the greater will apply.

We attempt to fit as much of a program into as few days as possible.

If a program runs for more than one day or with more than one presenter (because it will not fit into one day), a reduced minimum cost per day will apply for the second and subsequent days or presenters. The minimum cost per day for subsequent days is $400 metro/$560 regional.

If a school opts to spread their program over more days and/or with more presenters than necessary, the full minimum cost per day will apply for each day and presenter.
Regional Schools: Please call to discuss tour details and availability of programs.

GST: All prices listed above include 10% GST.

PROGRAM REQUIREMENTS:
- access to the presentation room 1 hour prior to the first session
- a room that can be darkened
- 2 tables at the front of the room
- a power point
- a sink with running water in the room
- seating for up to 60 students
- those attending a session are required to wear closed toe shoes that cover the top of the feet

Bookings: CSIRO Education, phone (03) 9252 6387, fax (03) 9252 6256.
